

CEN-PE-CO FUEL ADDITIVES

Since 1942, Central Petroleum Company (Cen-Pe-Co) has been a leader in fuel additive technology. From the earliest gasoline engines to today's most powerful diesels, Cen-Pe-Co has provided additives to keep engines running like new.

Cen-Pe-Co's patented additive technology gives today's diesel engines: more power, reduced emissions, better fuel economy, and longer life of fuel lubricated parts.

Cen-Pe-Co Fuel Additives improve the thermal stability of fuel to prolong filter life and reduce deposits.

From light-duty to extreme heavy-duty diesel engines, Cen-Pe-Co Fuel Additives provide less smoke, less noise and vibration, more power (torque) in the hills, and more miles per gallon.

Cen-Pe-Co Power Flo Klenz is packaged in: bulk totes, 55 gal, 35 gal, 20 gal drums, 5 gal pails, 1 gal bottles, and pint bottles.

Add Cen-Pe-Co Power Flo Klenz into diesel or bio-diesel fuels at a rate of 1:400. For enhanced, extreme cold performance may be mixed at a rate of 1:200.

U.S. Patent # 5,656,039
Additional Patents Pending

The Cen-Pe-Co Fuel Additive Advantage:

- Noticeably reduces engine vibration and smoke
- Restores lost fuel lubricity in new ultra low sulfur fuels
- Compatible with biodiesel blends, improving performance and corrosion protection
- Improves fuel efficiency 3 to 8%
- Increases fuels cetane up to 5 numbers
- Improves fuel's thermal stability for reduced filter deposits
- Improves engine throttle response and horsepower

FUEL ADDITIVES

DIESEL FUEL IMPROVER

- **Improves Performance**
- **Saves Fuel**
- **More Power**
- **Anti-Gel Protection**

"Specialists in Fuel Additive Technology - Since 1942"

PROVIDES CETANE IMPROVEMENT

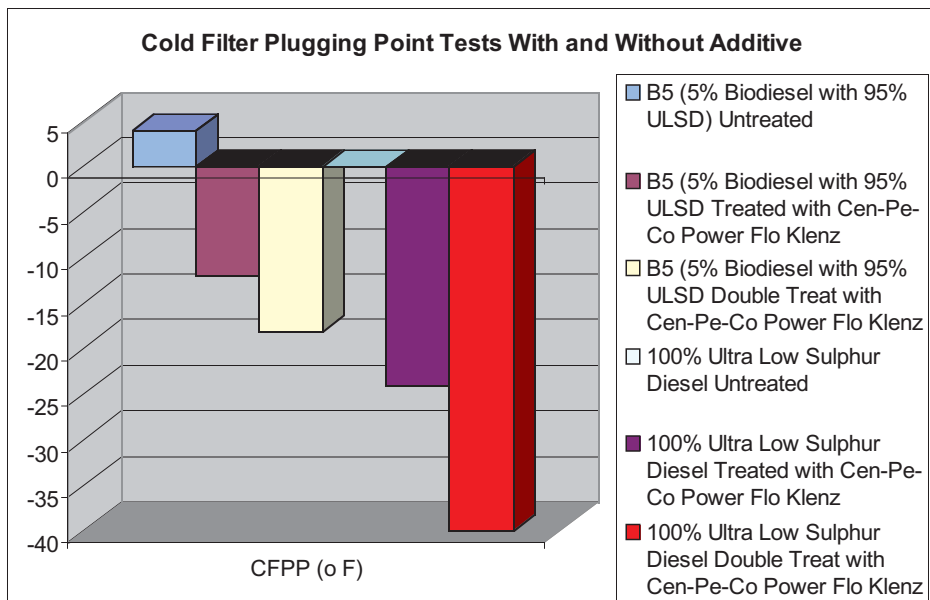

Cen-Pe-Co Fuel Additives improve fuel's cetane rating up to 5 numbers, exceeding OEM requirements.

DISPOSES OF WATER IN THE FUEL

Cen-Pe-Co Fuel Additives allow water laden fuel to be carried to the fuel/water separator where water can be drained off, not emulsified into the fuel where it could cause corrosion to the injection system.

APPROVED FOR USE IN BIODIESEL AND BIO BLENDS

Cen-Pe-Co Fuel Additives are formulated and proven effective in both biodiesel and biodiesel blends.

KEEPS FILTERS CLEANER

Today's ultra-low sulphur diesel fuel contains microscopic particulates known as "asphaltenes". These black, tar-like contaminants are a residue of the refining process and over time build-up and plug filters.

LUBRICATES FUEL SYSTEM

Cen-Pe-Co Fuel Additives contain special lubrication properties for added protection when using today's "dry" fuels. Especially beneficial in common rail injection pumps requiring additional lubricity.
